Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Re-Opening of Prosecution After Decision By BPAI

The examiner in receipt of the BAPI reversal of examiner's rejection mailed 3/28/2006. The examiner contacted applicant's representative, Mr. Rich Wither, on 5/17/2006 and asked if he would review TURGEON (PG PUB 2003/0014371) and provide rationale of how the current claims overcome this prior art. Since Mr. Wither did not timely respond to this request, prosecution is hereby reopened and the following rejection based on TURGEON is provided below:

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4,6,9-11,13-16,18,21-24 and 27 are rejected under 35

U.S.C. 102(e) as being anticipated by TURGEON (US PG Pub 2003/0014371).

In regards to claims 1-4,6,9-11,13-16,18,21-24 and 27, Turgeon teaches all the features of the instant claims. For instance, Turgeon teaches a system and method that provides secure access over public communication lines using encrypted information on a removable, portable storage medium. Information relating to a customer's financial account is encrypted and stored to a disk. When a customer desires to purchase goods and/or services on-line or access his financial account, he inserts the CD into a disk drive of a personal computer. The

Art Unit: 3625

encrypted information is retrieved from the disk and transmitted, via public communications lines, to a computer maintaining a Web site for providing the requested goods and/or services. The computer then forwards the encrypted information to a secure network. A processor on the secure network processes the customer's request, and denies or approves the transaction based on the received information. The results of such processing are returned to the computer maintaining the Web site for completing or aborting the transaction.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5,7,12,17,19,25 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over TURGEON in view of Official Notice.

In regards to claims 5,17 and 25, TURGEON teaches providing links to secure a connection to website, but does not specifically mention that there is a Bookmark created for the website. The examiner takes Official Notice that placing bookmarks on a browser was old and well known in the art at the time of the invention. It would have been obvious to a person having ordinary skill in the art at the time of the invention to include in TURGEON placing a bookmark for

Art Unit: 3625

easy access, because this would assure that website is used before others as a preferred place to shop.

In regards to claims 7,19 and 27, TERGEON teaches storing a shipping address in the portable device and an opportunity to change the stored shipping address (para 0058), but does not specifically mention that the portable queries the user to select one of a plurality of shipping addresses. The examiner takes Official Notice that offering a plurality of addresses for selection by a user was old and well known at the time of the invention. It would have been obvious to a person having ordinary skill in the art at the time to include in TERGEON offering the user several addresses to select from because customers must be enabled to do transactions quickly or the merchant will loose customers (para 005), therefore adding this information would require only a selection and would not require adding additional information.

In regards to claim 12, TERGEON teaches providing information over the Internet from a computing device (FIG 4), but does not specifically mention that the computing device is wireless. The examiner takes Official Notice that the use of wireless computing devices to accomplish ecommerce transactions was old and well known in the art at the time of the invention. It would have been obvious to a person having ordinary skill in the art at the time of the invention to include in TERGEON the use of wireless devices because this would increase

Art Unit: 3625

the usage of the system of TERGEON and increase the revenue provided by its use.
